

Algebra: Variables and Expressions

(6.EE.A.2 and 5.OA.1)

Name: _____

Date: _____

Directions:

Evaluate expression (1) by substituting the given values for n:

Joe wants to buy some new apps which cost \$.99 each plus tax, which is at a rate of 8%. He also wants to purchase a \$5.00 gift card. Use the following expression to calculate how much money he will spend if n = the number of apps he purchases.

$$.99n + 5 + [(.99n + 5).08] \quad (1)$$

1) $n = 2$

2) $n = 4$

3) $n = 7$

4) $n = 10$

Algebra: Variables and Expressions
(6.EE.A.2 and 5.OA.1)

Answer Key

- 1) \$7.54
- 2) \$9.68
- 3) \$12.88
- 4) \$16.09
