Addition of Fractions

Word Problems

(4.NF3.d)

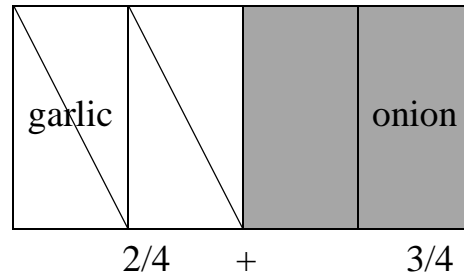

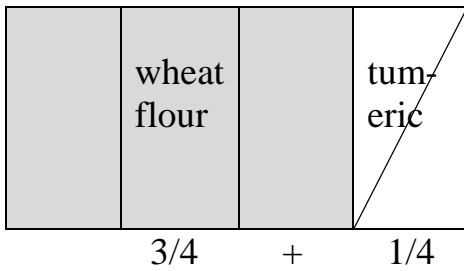

Directions: Solve the following word problem using equations, pictures (model drawings), and words. 😊

Lisa makes falafel for her restaurant. Her recipe calls for $\frac{3}{4}$ cups of wheat flour, $\frac{1}{4}$ cup of turmeric, $\frac{2}{4}$ cups of granulated garlic, and $\frac{3}{4}$ cups of granulated onion. How much does she need in dry ingredients?

Answer: _____

Name _____

Date _____

KEYShe needs $2 \frac{1}{4}$ cups of dry ingredients in her recipe.

$$\frac{3}{4} + \frac{1}{4} + \frac{2}{4} + \frac{3}{4} = \frac{9}{4} = 2 \frac{1}{4}$$
