Addition of Fractions

Word Problems

(4.NF3.d)

Directions: Solve the following word problem using equations, pictures (model drawings), and words. 😊

Julie makes homemade brownies from scratch. In her recipe she uses $\frac{1}{4}$ cup of milk, $\frac{1}{4}$ cup of oil, and $\frac{3}{4}$ cups of water. How much liquid does her recipe call for?

Answer: _____

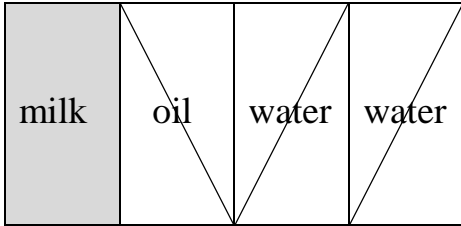

Name _____

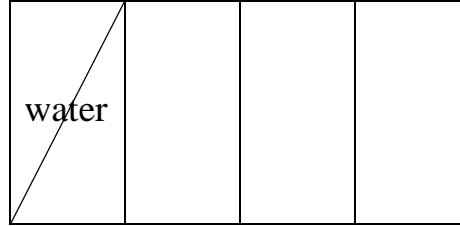

Date _____

KEY

She uses $1 \frac{1}{4}$ cups of liquid in her recipe.

$$\frac{1}{4} + \frac{1}{4} + \frac{3}{4}$$

$$= \frac{5}{4} = 1 \frac{1}{4}$$
