Algebra - Writing Expressions that record calculations with Numbers (5.OA.A.2)

◇ Definition: Expression - a series of numbers and symbols (+, -, x, ÷) *without* an equal sign.

Directions: Write expressions for the following.

① Add 14 and 6, then multiply by 5.

② Double 12 then divide by 6.

③ Three times the sum of \$4.50 and \$0.36.

④ Half the difference of 4,577 and 633.

⑤ Add 721 and 53, then multiply by .08.

⑥ Seven times the product of 10 and 3.

⑦ Describe how the expression $7(10 \times 10)$ relates to the expression (10×10) .
